

Annual Spring Dust Off and George Luhrs Shop Tour

Saturday, April 20th, 2013

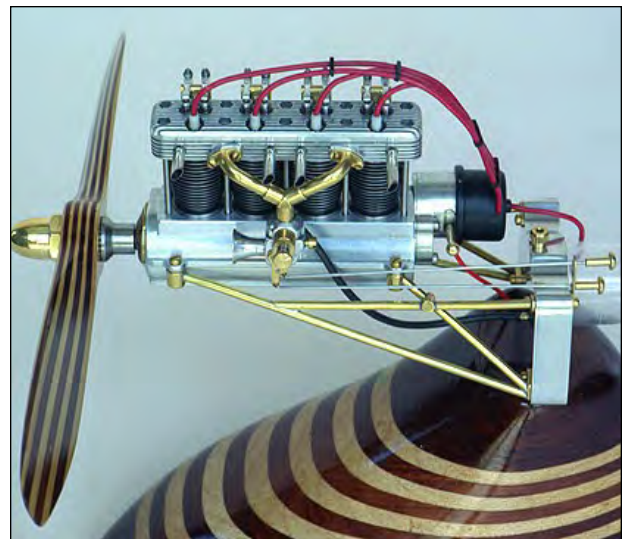

Time: 10:00 am

George Luhrs displayed some of his engines at the recent Vanderbilt Concours d' Elegance along with his 1960 Maserati Supperleggera. He spent his working life as a professional machinist running his own business. He did aerospace and R&D work that required great precision. Now he finds challenge in building the world's smallest running internal combustion engines. Mr. Luhrs' models have been featured in many magazines including *Strictly I.C.*, *Modeltec*, *Fine Scale Modeler*, *Live Steam*, *Radio/Controlled Model Cars* and *Great Scale Modeling*.

We now have an opportunity for a private tour of George's machine shop at his home in Shoreham, NY. After the tour George will be our guest for Lunch at Savino's Hideaway Restaurant in Mt. Sinai.

George is seen at his show display booth with some of his engines and awards.

All his models are working engines, 4 cycle, hit & miss engines, all with hand made spark plugs.
